Boarding Release Form

At North Florida Animal Hospital, there is nothing that is more important to us than the health and well-being of the pets in our care. In order to provide a healthy environment for our boarding pets, free of viral diseases and fleas, we require the following. . .

Current annual vaccinations including Rabies, DA2LPP, and BBIN for canines and Rabies, FVRCCP for felines. A canine bordetella (BBIN) vaccination must be received every six months to help prevent kennel cough. All vaccines must be given by a licensed veterinarian.

Any pet with a noticeable flea problem will be given a fast acting adulticide (capstar) for a nominal charge.

We also have an obligation to treat our boarders for any illness or emergency that may arise during their stay. We will try to contact you or any emergency contact that you specify. However, if we are unable to reach you, the health and well-being of your pet must be our first priority and treatment will be instituted at the doctor's discretion.

Would you like your pets to board together?

**We are unable to board cats and dogs together.

YES _____ NO _____ Please check one.
